This old cemetery is located at junction of New Lotts Road and Schenck Street, Brooklyn, N. Y. The following inscriptions were copied in 1878 by Mr. William F. Wyckoff, of Jamaica, Long Island. In 1913 the city decided to do away with it and I went out there and copied what stones were readable and in the following they are marked by a star, which is interesting as it shows how very rapidly the stones disappeared.

There is a new cemetery, so-called, across the street, the inscriptions of which, copied in 1878 by Mr. Wyckoff, will follow these.

1. The first part of the paper is devoted to a general discussion of the problem of the origin of life. It is shown that the problem is one of the most important and most difficult in the history of science.

2. The second part of the paper is devoted to a detailed discussion of the various theories of the origin of life. It is shown that the most plausible theory is the one which assumes that life originated from non-living matter.

3. The third part of the paper is devoted to a discussion of the evidence in favor of the theory of the origin of life from non-living matter. It is shown that the evidence is very strong and conclusive.

4. The fourth part of the paper is devoted to a discussion of the various objections to the theory of the origin of life from non-living matter. It is shown that the objections are not valid.

5. The fifth part of the paper is devoted to a discussion of the various applications of the theory of the origin of life from non-living matter. It is shown that the theory has many important applications.

6. The sixth part of the paper is devoted to a discussion of the various conclusions which can be drawn from the theory of the origin of life from non-living matter. It is shown that the conclusions are very important and far-reaching.
